

PAOLO GASTALDI JOINS ALTEK GROUP

ALTEK are pleased to announce the addition of Paolo Gastaldi, a senior industry professional to its team to support the company's commercialisation of its recent new innovation, ALUSALT™.

Paolo, formerly Plant Manager at INTALS S.p.A, Italy a, well respected specialist in aluminium recycling technology, has over 25 years of operational experience in aluminium recycling plants including the operation of a large salt slag recycling facility. His experience will further strengthen the ALTEK team as it starts to commercialise its ALUSALT™ technology throughout the global aluminium market.

ALUSALT™ is an innovative new process that enables the local treatment of salt slag, a by-product of aluminium re-cycling, which will provide many financial efficiency benefits to the aluminium recyclers and also save the huge transportation, environmental and CO₂, impact of shipping many hundreds of thousands of tonnes of this material all over Europe to the small number of specialist recycling facilities.

Notes to Editors

ALTEK are a supplier of world leading technologies and equipment to the Aluminium industry. With offices in UK and US it serves a customer base of over 500 aluminium companies around the world. It is currently expanding its UK operation in Chesterfield, Derbyshire which is based on a two acre site.

ALTEK has over 75 employees globally and has a reputation for innovation and the introduction of new technologies to the aluminium industry.

ALUSALT™ was developed with the support of the EU Horizon 2020 Research and Development Programme.
