

ALTEK Ingot/Sow Mould Castings

Through our experience in designing durable castings for the ALTEK Dross and Salt Slag cooling presses, ALTEK has expanded its product base and now supplies a variety of casting products for the aluminium industry.

Maximising Productivity...

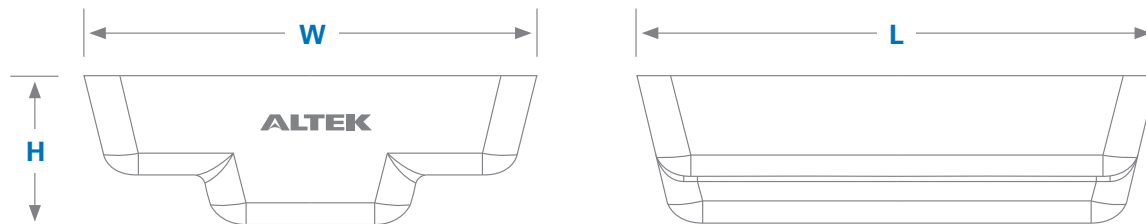

Products include ingot sow moulds, skim pan sets, dross containers and salt-cake containers. ALTEK can provide a variety of material grades including our RHINO-CAST® alloy steel which has been specifically developed to withstand the severe casthouse environment and is designed to endure both mechanical and thermal shock. ALTEK not only provides an extensive array of “standard” casting products but can also supply custom designed castings for your specific applications.

Available options

- Custom designed ingot sow moulds, suited specifically to your needs
- Fully cast fork pockets
- Cast feet / lugs for ease of material handling
- Material Choice:
ASTM A27 Grade 65-35
ALTEK’s patented RHINO-CAST® steel

Description	Outside Mould Dimensions			Inside Mould Dimensions			Approx. Mould Weight
	Length	Width	Height	Length	Width	Height	
450 Kg Standard Profile	946	946	444	841	841	368	625 Kg
550 Kg Standard Profile	978	978	482	873	873	406	695 Kg
550 Kg Low Profile	1372	1220	317	1270	1118	267	940 Kg
680 Kg Low Profile	1422	1232	350	1320	1130	298	1020 Kg
900 Kg Low Profile	1473	1257	406	1371	1207	356	1150 Kg
